

As a long-time listener to XM Radio, I respectfully urge my public officials and FCC to do whatever is necessary to protect it. Satellite radio is a very welcomed technology that has the ability to change radio as we know it forever. Local radio's traditional method of providing snippets of traffic and weather does not come close to the service we receive from XM Radio. As a result, please reject NAB Petition 04-160. As a consumer, I want XM Radio's Instant Traffic and Weather. Please act accordingly...
